Rancher Labs
P.O. Box 1658
Mountain View, CA 94042

To Whom It May Concern:

Acumen Security, LLC., a NVLAP accredited laboratory (NVLAP Code: 201029-0), is under contract with KeyPair for Automated Cryptographic Validation Testing System (ACVTS) and operational testing for Rancher Labs of the following module:

Module name: Rancher Kubernetes Cryptographic Library
Version number: 66005f41fbc3529ffe8d007708756720529da20d

Acumen is the largest laboratory in North America and has successfully completed hundreds of FIPS 140-2 validation efforts, all have resulted in the issuance of a FIPS 140-2 certificate.

This letter does not in any way imply that the aforementioned module is FIPS 140-2 validated. Moreover, Acumen cannot guarantee that this module will successfully complete the FIPS 140-2 validation process. Final decision of whether the module meet the requirements of the FIPS 140-2 standard and thereby can be considered certified rests solely with the Cryptographic Module Validation Program (CMVP).

Please contact us if you have any questions.

Sincerely,

Ashit Vora
Vice President
